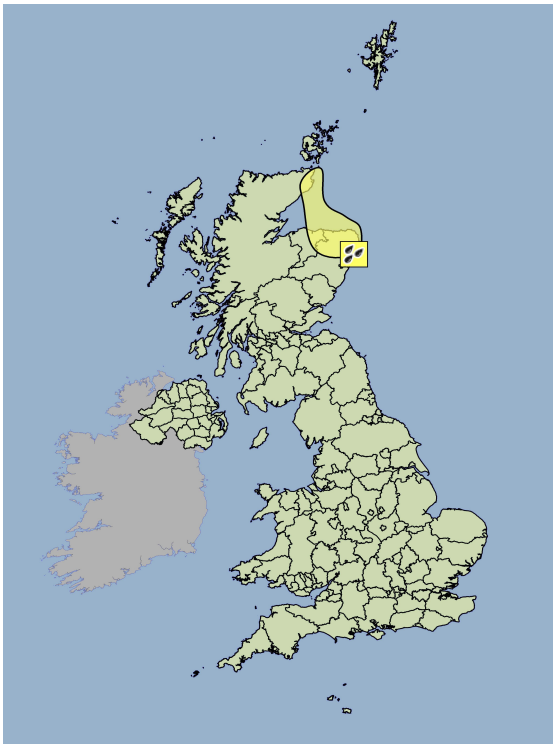
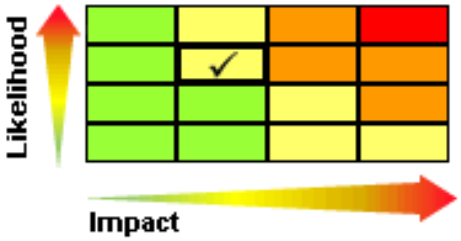
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure developing off northeast Scotland will see scattered heavy showers being replaced by more prolonged rain this morning. Persistent rain accompanied by strong winds is then likely for much of the rest today and is expected to bring 15-25 mm quite widely, with a risk of more than 40 mm in a few locations.

This is an update to the warning issued yesterday to confine the area of coverage to eastern Moray, northern Aberdeenshire and the east of Caithness and somewhat reduce rainfall amounts.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **07:00 on Sun, 07th Sep 2014** until **23:00 on Sun, 07th Sep 2014**

A spell of persistent and occasionally heavy rain is expected across northeast Scotland today, coupled with strong winds.

The public should be aware of the risk of local flooding and possible minor disruption to travel.
